2. You may enter NKDA or Select 'Add Allergy'.

Allergies		
Active Allergies 🞯		
Allergies Not Entered		
Hide Add Allergy Ø NKDA		
Enter allergen name Q Clear Or Se	ect Common Allergen 🗸	

3. To add an allergy, enter the allergy in the search bar, and select the one that applies, or use the drop down to "Select Common Allergen" from the list.

- 4. After selecting the allergy, then the reaction, severity and onset date may be entered.
- 5. After the data is entered be sure to select 'save'.

If an allergy is entered Medflow without a code attached (i.e. free typed), when user goes into DrFirst there will be a red warning symbol. Users may click the "Find Match" link (under the top left | Allergy | 'find match' magnifying glass) to reconcile the allergy.
